ABOUT ME

From a very early age in dentistry has always had a strong impact on me both in terms of being mentally challenging and also as a profession. This has now become even more after graduating from AlMustaqbal University. Working as a general dental practitioner at some places shows how capable I am at this field. I have had working at Restorations, Pedodontics, Endodontics and surgery. During that period I undertook various functions including working within the reception area, booking appointments, using their computerized systems and observing various dentists at work. I found that this provided me with a further insight into day-to-day dental management. Finally, I am personally looking to the future, I would appreciate the opportunity to fulfill my ambition of working within the dentistry profession. I feel I have a strong desire, good communication skills and the commitment to undertake the study of dentistry.

Education

Dental and oral surgery

Qassim private college

2015-2021
